Key projects and work experience

2018 as freelancer

EVEN Foundation

EVEN mobile dashboard for decentralized cross-chain platform. What used: electron on server and Vue.js on client. I wrote the client part on Vue.js.

2017-2018 as tech lead

B2B-Center site optimization

Led to a 70% decrease wait loading time and 22% increase in SEO traffic for <https://b2b-center.ru>

2016-2017 as tech lead

B2B-Center front-end deployment system

Implemented a incremental build system: massive LESS architecture, PostCSS, images minify, ES6babel compile, special SVG fallback sprite generator, and special React.js bundles by webpack.

2016 as CO-Founder

BOOOSH mobile app

For three months we wrote mobile app using framework7 on client and express on server side.

2015-2017 as tech lead

B2B-Center Ui-Kit

Developed and implemented Ui-Kit.

2013-2015

B2B-Center

Created maintainable/scalable architecture using MCSS methodology. Big system refactoring for JS and LESS workflow.

2012-2013 as freelancer
